

## Locker service without key problems

There are three dimensions of locker locking:  
Self service - Multi function – Independence

## The perfect solution for every locker.

The storage of clothes, personal belongings and valuables – without key problems – this is what SAG offers. The three worldwide successful locking systems fit all dimensions of efficient locker organisation.

1

### Self service

**SAFE-O-MAT®** twin-coin deposit and multi-use locks  
Coin insertion reduces staff costs for key administration and generates additional profits if the locks are set for coin collect.

2

### Multi function

**SAFE-O-TRONIC®** Transponder lock  
The transponder takes over the function of the key (e.g. as a card or wristwatch) and offers additional turnover from spontaneous purchases (e.g. sales of food or drinks).

3

### Independence

**SAFE-O-PIN®** PIN-code lock  
The keypad lock for memory aided locking eliminates the need for keys or data carrier and liberates you from key handling and staff costs.

The complete program from the leading manufacturer of intelligent locking systems for lockers:

analog - digital - memory aided

1

**SAFE-O-MAT® twin-coin**  
**Deposit and Coin collect locks with 2-coin insertion or as ticket-/coin lock**

mechanical

**Self service, the analog locking device**

- Reduction of staff costs through self service and coin choice.
- Protection against key loss and liability risks.
- Coin collect function for higher profits and more convenience: The user can open the locker during his stay as often as he wants without „paying again“.

2

**SAFE-O-TRONIC®**  
**Patented transponder locking system**

Electronic, no wiring

**Multi function, the digital locking device**

- Free from wear through contact free transponder technology.
- Can be programmed easily and flexibly.
- Can be integrated with data systems for access control, time control and cashless payments.

3

**SAFE-O-PIN®**  
**PIN-Code lock**

Electronic, no wiring

**Independence, the keypad lock for memory aided locking.**

- Keyless locking - just enter your personal ID.
- No cost for staff because the labour for key handling has vanished.
- No consequential cost for lost keys or data media.

**Compatible measurements**

Measurements for mounting the SAFE-O-MAT®, SAFE-O-TRONIC® and SAFE-O-PIN® locks are compatible – even to existing SAFE-O-MAT® installations. This guarantees the easy installation – even for conversion.

**Info service**

Detailed information about SAFE-O-MAT®, SAFE-O-TRONIC® and SAFE-O-PIN® will be sent to you upon request.
